

I am very concerned about the impact of the LPFM station change and how it will affect my ability to listen to K-LOVE. This station provides me with a resource not otherwise available in my area, but it's broadcast would be blocked if the LPFM change takes place, and these low power stations come on line. It is important to me that K-LOVE continue to be received in my area because of it's unique contribution. I believe that it's services are unique and of great value to the community
